

RUST BULLET FOR CONCRETE

RUST BULLET FOR CONCRETE is specifically formulated for the needs of consumers and professionals looking to put down a quality concrete coating with our typical low surface prep cost and outstanding look and durability. Rust Bullet For Concrete is made to lay down smoothly over concrete surfaces, such as garage floors, patios and basements. Rust Bullet For Concrete will give customers a beautiful, metallic grey finished surface that will provide long lasting protection against grease, oils, chemicals, abrasion, scratching and hot tire pickup. Customers typically apply it with an ordinary 3/8" nap roller and it may also be sprayed or brushed on.

By adding some multi-colored flakes, consumers can customize the finished appearance of their floor to give a unique and professional look without having to spend a fortune. Add a protective coat of Rust Bullet Clear Shot (with some non-skid grit) and you have a glossy shine that is magazine cover ready!

Rust Bullet, LLC will provide a standard 5 year warranty for this product when used on concrete floor surfaces. **No** warranty claims will be honored for Rust Bullet For Concrete's use in any other applications (such as metal, wood, automotive, etc.) or applications not in compliance with Rust Bullet For Concrete application guidelines. Please contact Rust Bullet, LLC for warranty details.
